

Mental Health, Wellbeing and Productivity

Dinner with a Difference

Mental health is fast becoming the business issue of our time. There are lots of solutions emerging but many organisations do not know where to start, or where to go next. How can employers make evidence-informed choices about what works for them? How can we put mental health into wider conversations about employee wellbeing and productivity? And could we build a framework for mental health that focuses on the impact of strategic changes such as the impact of technology and AI?

To discuss these questions and findings from our recent research Tomorrow's Company invites you to join us for a 'Dinner with a difference'.
